FIGURE 48–1
A and B. The author’s concept of the appearance of the tuberous breast is shown before and after augmentation mammoplasty.

FIGURE 48–2
A and B. The appearance of a ptotic tuberous breast before and after augmentation mammoplasty (author’s concept).
FIGURE 48–3
The planned new position of the areola is shown, following the first stage of augmentation of the tuberous breast.

A and B. The area of areola de-epithelialization is shown, as is the technique of advancement of the new areola position. Notice the collapsing technique created, utilizing 4-0 clear nylon sutures. C and D. The newly positioned areola is shown before and after upward repositioning.
